Certifications

- CompTIA CySA+
- CompTIA Security+
- CompTIA Network+

Technical Skills

Security & Monitoring:

SIEM configuration, SOAR playbooks, alert tuning, incident response, log analysis

Networking:

TCP/IP, VLANs, firewall configuration, DHCP, network segmentation

Security Frameworks:

PCI-DSS, select NIST controls

Hardware:

PC building, imaging, troubleshooting, and repair

Tools:

VMware, Linux CLI, basic scripting (Bash/PowerShell), Active Directory

Other:

Malware analysis (static & dynamic), threat detection, digital evidence handling

Programming Languages

- Python
- Html/CSS/java script
- Bash
- basic c+, c#, PowerShell

Additional Experience

AV: Managed AV systems for 8+ years

Audio equipment: Installing surround sound systems

Professional Summary

Cybersecurity professional with hands-on experience in security engineering concepts, SOC operations, and lab-based threat analysis. Proven ability to design secure network architectures aligned to PCI-DSS standards, build SIEM/SOAR workflows, and perform malware analysis in controlled environments. CompTIA Network+, Security+, and CySA+ certified. Strong troubleshooting background with Help Desk experience and a focus on moving into a Security Engineer role.

Projects

Enterprise Network Architecture Project

- Developed a 40+ page security architecture document guiding a business on securely implementing network infrastructure
- Aligned recommendations with PCI-DSS and select NIST controls
- Designed network segmentation, secure configurations, and RBAC controls enforcing least privilege principles.
- Recreated proposed architecture in a virtual lab to demonstrate and validate security control configurations

Malware Analysis & Soc lab environment

- Built an isolated virtual malware analysis lab for static & dynamic analysis
- Analyzed malware behavior, identified indicators of compromise, and practiced code deobfuscation techniques
- Configured a SIEM & SOAR to simulate enterprise monitoring
- Developed custom detection rules, alerts, and automated playbooks
- Practiced incident response procedures

Continuous Security Training

- Actively completing hands-on labs and challenges on LetsDefend, Hack The Box, and TryHackMe

Professional Experience

Cottingham & Butler – IT Analyst I

May 2026 to present, 800 Main st, Dubuque, IA 52001

- Providing tech support by resolving tickets remotely and in person
- Triage and resolved hardware, software, and network issues while maintaining SLAs
- Maintained IT inventory by tracking equipment while imaging, deploying, reclaiming, and decommissioning computers
- Managed user access and group memberships in Active Directory and Intune.

Emmaus University - AV/IT Associate

November 2023 to present, 2570 Asbury Rd, Dubuque, IA 52001

- Providing tech support and troubleshooting for staff and students
- Registered new devices for student
- Assisted with AP installations
- Operated and managed AV systems for campus events

Education

Emmaus University - Bachelor of Science in Cybersecurity

Dubuque, Iowa

August 2023-May 2026

GPA 3.45
